Executive Secretary

2 June 82

Date

SECRET

2 June 1982

MEMORANDUM FOR: Director of Soviet Analysis
Director of Scientific and Weapons Research

FROM: Director of Central Intelligence

SUBJECT: Microanalysis of the Soviet Military
Industrial Complex

1. I want to compliment you and express my appreciation for the work you did on the microanalysis of the Soviet military industrial complex. The work you have completed, under way, and scheduled is impressive. I also found the table you prepared on areas of research, availability of data and intelligence payoffs to be thoughtful and perceptive. For the four areas listed, it seems to me that the further work on the availability of resources might have the most immediate value. I have asked for your comments on the draft paper on the relationship between the Soviet economic troubles and pressure for arms control which strikes me as a good first cut on that subject. It needs to be carefully evaluated for its soundness on the basis of our present data base, somewhat revised to reflect our objectives which would be to reduce the more lethal and destabilizing elements of the Soviet military rather than those that offer the greatest economic balance.

2. It seems to me that the cost of expanding microanalysis of the Soviet military industrial complex, which on the basis of your resource requirements, I would put at something [redacted] for the additional people and external assistance, would be an investment and something we might be able to make a start at and require a rising level of resources in the 1983 and 1984 budgets.

William J. Casey
